BUY YOUR HEATERS EARLY

There are many reasons for the above suggestion. One of which is that the available supply at the present time is very limited.

Our Very Hot Blast Heaters are by far the best adapted to our local coal. They are heavy brick lined, have roller grates and deep ash pans.

While they last the prices are the same as last year. \$27.00 small size; \$30.00 medium and \$35.00 largest size.

Council Receives Returns From "Flu" Cases

The regular meeting of the local town council was held tonight, when the minutes of last regular and special meetings were approved and read and the following accounts were passed for payment: A. W. Robbins \$9.00, Alberta Government Telephone \$4.75, Blairmore Hardware Co \$83.36, G. H. Schiller \$7.00, M. Joyce \$16.00, E. Picard \$7.50, petty cash account \$24.00, L. H. Putnam \$40.00, Dr. Olivier \$62.50, B. Seriani \$22.00. The accounts of A. J. Olson and H. Benson were lacking necessary particulars and were laid over to be considered at next meeting.

A statement of receipts and expenditures for the waterworks and electric light departments for the month of September was submitted by the secretary-treasurer. The statement showed a very satisfactory surplus for these departments. A statement was received from Solicitor Putnam, accompanying his cheque for upwards of \$400.00, being net returns to the town from action instituted against a number of individuals who became a cause upon the town during last fall's flu epidemic. Several parties are yet to be heard from.

On motion by McDonald - MacIntosh, W. J. Bartlett was appointed deputy mayor for the three months ending December 31st.

The amendment to By-Law 64, introduced by Councillor Bartlett, was passed, limiting the fire area to all lots in Blocks 1 to 6 fronting on Victoria Street. In this area no buildings are to be erected or removed without a permit from the council, and all buildings, erected are to be of fire-proof construction.

"In Old Kentucky"

Coming to the Opera House on October 27th, is the well known play "In Old Kentucky," a company travelling in their own private sleeping car, and using a sixty-foot baggage car to transport their production from city to city. The company numbers nearly thirty-five people and includes the famous "Race Horse" in which "Queen Bees," ridden by the captivating Madge, wins the race. The band will make a noon-day parade and give one of their favorite concerts as the doors open.

The advance sale of seats for "In Old Kentucky" will open at 4 p.m., and the management of the opera house, advises the people to secure their seats as early as possible. The reports on this attraction are first class, and they are playing to big business everywhere.

Remarkable Bank Clearings Emphasize Importance of Victory Loan

Judging from the statement of bank clearings for the month of September, Canada is doing an unprecedented amount of business. The clearings advanced 40 per cent. over September of last year, which itself was a large month.

All sections of the country shared in the advance of business; some cities doing double the trade of September, 1918. Many quite remarkable increases, outside of the specially large advances Winnipeg and Windsor, were noted. Toronto gained 37 per cent., Brantford 47 per cent., Kitchener 57 per cent., London 35 per cent., Ottawa 51 per cent., Edmonton 60 per cent., Prince Albert 94 per cent.

The present remarkable period of prosperity in Canada will be maintained if the Victory Loan, 1919 is made an overwhelming success. Business men realize this and in the interests of themselves and the country are being urged to press the importance of the coming loan, upon every one with whom they come in contact.

Hippodrome Vaudeville At Opera House Friday

Hippodrome Circuit Vaudeville Road show number two will be presented at the local theatre Friday night and promise to beat last week's fine bill. Four exceptionally good acts are to be presented Friday.

Bergin and Bergen, vaudeville's classic duo, will open the show. The girls have splendid voices, and sing the classical and popular successes, giving the audience a remarkable contrast. The girls are very versatile and will amuse the audience in line style.

Herbert "Hert" Lenton, the clever character actor, will present the original conception which he calls "Fifteen Minutes of Characters." He makes up in front of the audience and impersonates many famous characters of the past. A good line of new stories and songs, and makes many quick changes from one type to the other.

Rainbow, Lily and Mohawk style themselves the "20th Century Indians." Their act is replete with new novelties, rich costumes, clever dancing and some very fine singing.

Their act is a big novelty and will be one of the bright spots on the bill.

Closing the show will come Friedlander Brothers, a really funny pair of musical comedians who will present their comedy musical revue. They offer a repertoire of musical numbers on scores of musical instruments arranged by themselves. Comedy and good music are predominant features of their act, which will prove to be a real laugh getter.

Riddle Folio in "A Prisoner for Life" will lead the picture fall, to which will be added "The Spotted Bag," a rollicking comedy, and several other features. The Colonial Concert orchestra will offer a new musical program.

Over a Billion

Saved by People

Some Striking Figures of Savings Deposits from Bank Statement for August

A total of \$1,196,632,931 in savings bank deposits is a gratifying report that many of the communities which have emerged from war would be glad to report to-day. This is the position of Canada as revealed in the bank statement for August.

The amount is \$181,921,068 better than the same month last year, notwithstanding the fact that a good part of it was transferred to last year's \$800,000,000 Victory Loan, and is \$21,540,778, better than July of this year.

This is a promising outlook for the Victory Loan campaign which is at present being carried on. If the depositors in Canada's savings banks were to say the word, they could subscribe the \$300,000,000 asked nearly four times over. The success of the present effort should be overwhelming.

HELP THE VICTORY LOAN

The Victory Loan campaign in Southern Alberta is going with a swing. Reports from the central committee in Calgary say that the campaign have completed their organization and that the Loan is meeting with a far better reception than had been anticipated. There will be a great deal of honor in going "over the top" on this Loan and it is to be hoped that this district will do its share and will make at least as good a record as last year.

"Victory Loan 1919 is going to be very popular indeed. In the first place the security is excellent and the investment is a better one than will probably be available in government bonds after this occasion. To get Canada's bonded obligations bearing 5 1/2 per cent. interest at war is something that was not dreamed of before the war and will not be again. For this reason, there is little doubt that the bonds will go above par on the market almost as soon as they are issued, and that anyone who buys

them during the campaign will be able to sell them at a profit thereafter. That, at least, is the history of the previous bond issues and there is no reason why it should not be the history of this one.

Southern Alberta is especially interested in the success of the Victory Loan because the money is to be used for the re-establishment of our soldiers and the financing of crop and other similar payments. Being so, it will get more direct benefit out of a Victory Loan than most other portions of Canada and it is therefore all the more her duty to support the loan to the best of her ability.

Organization and work are progressing in this district and in others and the general committee asks that the public assist their local canvassers in every possible way, and especially by subscribing promptly and as largely as possible when the canvassers come around. The selling campaign will open on October 27 and continue till November 15.

NOT A MOVING PICTURE

British Premier On Need of the Hour

London.—In a speech at Sheffield, Premier Lloyd George urged the need of greater productivity on the part of the nation. He pointed out that the national debt was nearly £8,000,000,000. He said wages had doubled, the hours of work were curtailed and the standard of living was higher than ever, but that that standard should not be preserved by a concourse of tribunals or the decisions of labor conference.

The Premier called upon the British people to see that the peace was a real peace.

"It is not the British habit," he said, "to nag, harry, insult and trample a bleeding foe. So long as Germany conforms to the conditions we have laid down, we must give her a clear chance to lead a decent, peaceable and honorable existence."

Some Teamsters Still on Strike
New York.—Striking members of the International Brotherhood of Teamsters, Chauffeurs and Helpers, most of whom are employees of the American Railway Express company, voted to remain on strike after a meeting attended by 2,500 in Cooper union, while other teamsters engaged in transporting milk in the city decided to accept an increase of \$8 and \$6 a week, offered by the milk companies, instead of the \$10 weekly increase demanded by the men.

The express drivers' vote was practically unanimous, only one negative vote being recorded.

Contradictory Reports
Stockholm.—Reports regarding Russia are contradictory, some declaring that the town was taken by Estonians and others that its capture had been delayed owing to the destruction of the railroad tracks. The station, both to the south and north according to advices received here, are known to be in the hands of the White forces.

Riga More Normal
Helsingfors.—Conditions are becoming more normal in Riga following the German Russian attempt to capture the city. It is stated in advices received here.

Most of the newspapers are again appearing. Supplies are short, however, and prices of commodities are soaring.

Print Paper from Prince Rupert
Prince Rupert, B.C.—Thirteen carloads of paper made at Ocean Falls and consigned to the New York Times, are on their way east from Prince Rupert.

Word of the request to Germany to participate in a blockade of Soviet Russia came first from Berlin, and later was followed by reports from neutral states intimating that they, too, had been requested to join in a blockade. No definite announcement of such contemplated measures had, however, been made from Paris or London, causing adverse newspaper comment. It was stated in Paris that the United States did not join with the entente powers in asking Germany to co-operate in such a blockade.

Canadians Anxious To Come Home

Great Britain Is No Place for the Holiday-Maker at Present?

Ottawa.—The Department of Immigration and Colonization has received by cable a warning from England that there are thousands of Canadians on the other side anxious to come home, but unable to secure return passage for at least six months. It is said that this situation is being accentuated by the arrival of visitors from Canada. When the cable was sent from London, railroading had been resorted to. The weekly allowance was: Butter, 1 ounce; sugar, six ounces; coal, 100 pounds; meats, 40 cents' worth.

Canadians who contemplate a visit to the mother country during the next few months should take into consideration the impossibility of returning within a few weeks after arrival there.

Want Prohibition in France
Paris.—The fight against alcohol will be a leading plank of the national platform in the forthcoming elections. Ministers are demanding the absolute suppression of alcohol, and the walls of Paris and the large cities are already plastered with these demands, and pamphlets and posters have been mailed by the hundred thousand to hotels and individuals in the provinces.

"If France does not suppress alcohol, alcohol will suppress France," the posters proclaim in huge characters, and add, "Three million individuals live upon the traffic of alcohol; thirty-five million suffer and die from it."

Pensions Laws Give Little Complaint
Winnipeg.—Lieut.-Colonel John Thompson, chairman of the Pensions Board, Ottawa, and Major Stanley Corvett, commissioner, arrived in Winnipeg for a routine inspection of the district pensions office here. The commissioners have inspected the district pensions office from Victoria, B.C., to Winnipeg, and report that there was very little complaint as to the manner in which the pensions law was administered in the West. In practically all instances they found that a proper explanation of the regulations eliminated the reasons brought forward for the complaints.

Want Stamped Cheques
Winnipeg.—The Federal Government is being asked to arrange for an issue of cheques for the use of all chartered banks which will bear the two-cent stamp.

Hungarian Peace Pact Delayed

No Government in That Country With Which Supreme Council Can Deal

Paris.—The supreme council and the peace conference will probably not deal officially until after the Hungarian treaty is concluded, but only a few members representing the various governments will remain to complete the work.

An entirely new set of delegates will probably be instructed to negotiate the treaty with Turkey when the allied and associated governments will remain to complete the work.

The Bulgarian delegation is now on its way back to Paris and there is every indication that the Bulgarian treaty will be disposed of shortly. Only the Hungarian treaty remains to be negotiated.

There is no government in Hungary with which the conference can deal, but the treaty draft is practically completed in Paris and should there be no recognized government in Budapest before December 1, arrangements will probably be made to have a few delegates remain in Paris to negotiate a treaty with Hungary, whenever a satisfactory government is established.

No Dealings With Bolsheviks

Supreme Council Proposes Shutting Off Russia From Inter-course With World

London.—The text of the supreme council inviting Germany to participate in the blockade of Russia as published by the Berlin Tageblatt, and reprinted by the Daily Herald, shows that Sweden, Norway, Denmark, Holland, Finland, Spain, Switzerland, Mexico, Chile, Argentina, Colombia and Venezuela have been invited to initiate measures to prevent their nationals from engaging in any trade whatever with Bolshevik Russia. The measures are thus enumerated:

1. Refusal of permission to sail to every ship bound for a Russian Bolshevik port, and the closing of all ports to ships from Bolshevik ports.
2. Similar regulations to be adopted with regard to all goods destined for Russian ports by another route.
3. Passports will be refused to all persons, to or from Bolshevik Russia. Isolated exceptions may be made by agreement of the allied and associated powers.
4. Measures will be taken to hinder bankers from granting credit to commercial undertakings in Bolshevik Russia.

Every government will refuse its nationals any facilities of intercourse with Bolshevik Russia, whether by post or wireless telegraph.

Marshall Foch added the following instructions: "Inform the German government that the British and French governments are determined to continue to blockade Bolshevik ports and detain, from the moment they come in sight, any ships bound for Bolshevik ports."

The preamble to the note declares that the open enemy of the Bolshevik is directed against all governments and that programs of international evolution circulated by them constitute a grave danger to the national security of all the powers.

Land For Soldiers

2,700 Quarter-Sections In All for Sale By Public Auction This Fall

Ottawa.—Through the intervention of the Soldier Settlement Board, school lands in Manitoba and Saskatchewan, aggregating 432,000 acres, have been withheld from sale by auction, in order to be made available for settlement by returned soldiers. Arrangements have been completed to advertise these lands, 2,700 quarter-sections in all, for sale by public auction this fall. The lands are situated in the Winnipeg, Brandon, Ashern and St. Rose de Lac districts in Manitoba, and the Camrose, Wadena, Prince Albert and Wakarusa districts in Saskatchewan.

Double Tragedy Feared
Edmonton.—Grave concern is felt in Peace River over the reports brought in from Bear Lake by a half breed that he had found evidence of a tragedy out on the ice of Bear Lake. It is feared that two well-known young men of Peace River, Scotty Leitch and Duncan Stewart, are drowned.

Valuable Salmon Stock
Prince Rupert, B.C.—The Skeena River salmon pack has been completed, and the season's value is set at \$4,027,500. The sockeye pack was good and larger than usual, the total being 180,000 cases, which at \$15 a case is valued at \$2,700,000.

Tragedy of the Sea is Revealed

Survivors Say Officers Were Killed in Accident; Rescuers Speak of Boating Fight

Philadelphia.—A tragic tale of the sea was unfolded here by four survivors of the British schooner Onato, picked up while drifting helplessly several hundred miles from here by the Zirkel. The survivors, all from Newfoundland, said the captain of Onato, James Brussa, and his brother, Ernest, first mate, were crushed to death by the shifting of the ship's cargo.

The stories, however, do not agree with that told by Captain Sullivan, master of the Zirkel, which arrived here, and all four men were looked out of the Gloucester immigration station on charges of mutiny. They will be turned over to the British consul.

Captain Sullivan declared that when he drew near to the schooner he could plainly see a general fight raging upon the little craft's deck amidst, and that one of his officers said he had heard what he believed to be two pistol shots.

The survivors, Douglas Nichol, Thomas Molton, Lorenzo Ash and Ernest Brussa, all told the same story, except as to some of the details, which the authorities said were conflicting. They declared their officers met an accident and death while the company's crew was baffled to save the craft in a terrible sea.

Captain Brussa, and his brother, they said, went below to shift the cargo, and were crushed to death.

The Onato was bound for Newfoundland from Gloucester, Nova Scotia, carrying a cargo of salt. Officers of the Zirkel assert that the vessel sank shortly after the men were taken off.

Clemenceau Ministry Is Sustained

By Large Majority on Chronological Order of Resolutions

Paris.—The Clemenceau ministry was sustained in the Chamber of Deputies by a vote of 324 to 132. The premier, who victoriously emerged from the bitterest and best organized assault which the ministry has ever faced, the chamber, under the leadership of the policy on the chronological order of the resolutions, placing the legislative elections first, on November 16, and the senatorial and municipal elections thereafter.

For the first time, Aristide Briand, the former premier, came out openly in leading the opposition forces, but M. Clemenceau's majority was the largest he had ever received when the question of confidence was presented.

Presbyterians Ask For Reform Law
Ottawa.—Three resolutions dealing with the present day reform were passed at the session of the Ottawa Montreal Presbyterian synod. The first was the endorsement of the four "no's" of the Ontario referendum committee.

The second asked the Dominion government to make permanent legislation of the war time measure prohibiting the manufacture of liquor in Canada, its importation and the inter-provincial trade in it. The third asked the government to include racketeering gambling with other offences in the criminal code.

Check for the Consumer

Ottawa.—New regulations governing the lobster packing industry of the Maritime Provinces are provided for in an amendment to the Meat and Canned Foods Act, of which notice has been given by the government. Provision is also made for the correct labelling of all cans of fish or shell fish imported into Canada, and other particulars, including weight of contents, place of origin and the names of the packers, and also of the importer.

French Want Canadian Houses
London.—The secretary of the Export Association of Canada states that the association is consulting with the ministry of health for a supply of ready-made houses on the Canadian plan, in connection with the new government housing scheme, and a definite decision may be expected within a few weeks. There is a growing demand for these houses from France.

C.M.A. Extending Organization
Ottawa.—In pursuance of an intention of policy of organization, and with the object of permitting greater co-operation among members more or less closely located the Canadian Manufacturers' Association has divided the Dominion into five divisions, each of which will have a separate chairman, vice-chairman and executive.

Wants a Pool to Indemnify Allies

French Senate Adopts Resolution Asking for Further Diplomacy

Paris.—The senate adopted the resolution, which has already been passed by the Chamber of Deputies, asking the government to suggest to the allies further measures for the disarmament of Germany, and another resolution suggesting that France be given a prior claim in the distribution of reparation payments made by the Germans.

The Chamber adopted a resolution which, after expressing confidence in the spirit of equity and justice of the allied and associated powers, asks the French government to negotiate with them for the establishment of a common pool between the allies to indemnify the participants in the great war.

Huns Are in a Quandary

Germans Are Not Keen on Blockade of Russia, Soviets

Berlin.—Suggestions from the entente that Germany join in the blockade of Soviet Russia, have not yet been officially considered by the German cabinet, but have inspired a statement indicating the government's answer will neither be an unconditional refusal nor an indication of assent. It is said that the Germans will suggest the installation of an international commission to deliberate on the proposition which is unquestionably found German unprepared and places her in a quandary.

Hauling Wheat Across the Line

Winnipeg.—It is reported here in grain circles that farmers in Manitoba and Saskatchewan to a distance of 40 and 50 miles north of the international boundary line, are this fall hauling large quantities of wheat across to the United States market points and receiving 60 cents or 70 cents more a bushel than it would be possible if they sold their wheat in Canada.

This international trade has assumed such proportions that a number of elevators located at southern points in the two provinces are being closed up as the amount of business they are receiving does not warrant the expense of keeping them open.

Prohibition Enforcement Bill Signed

Washington.—The prohibition enforcement bill, signed by Vice-President Marshall and Speaker Gillette for immediate transmission to President Wilson. The President will have ten days from the time it reaches the White House to sign it. A doubt has been made at the White House that the bill would be referred to Attorney-General Palmer for an opinion as to its constitutionality before any executive action was taken.

Senator Polinder Says Measures Necessary Against Revolution

Washington.—The United States government is in grave danger from the movement of international revolution, and it may fall unless vigorous measures of defence are taken, declared Senator Polinder, Washington, in the senate.

"There are revolutionary interests in this country," Polinder said, "and their object is the overthrow of the government and the seizure of private property. There is no doubt of the existence of that condition."

No Chance For Profiteers

British Courts Take Prompt Action to Regulate Prices

London.—Following are typical examples of the decisions of the profiteering committees this week:

At Manchester the committee held that 20 per cent. too much profit was charged on the purchase of Manchester University, for trials for this cost. Twenty-five per cent. too much profit was charged also on a pair of trousers. Another firm of military tailors was ordered to refund 16 pence to a purchaser of a medal bar bought for two shillings. Many complaints have been postponed for further enquiries.

One alleged flaw in the Profiteering Act is that the onus of complaint is laid upon the purchaser, which obviously involves considerable trouble in the recovery of overcharges in individual payments. A church bazaar notice at Wimbledon significantly states that no article will be sold above shop prices.

R.N.W.M.P. Headquarters to Go East

Ottawa.—On a bill amalgamating the Dominion and the Royal Northwest Mounted Police, Sir James Lougheed in the senate stated that the headquarters of the organization would likely be in Ottawa, but a large portion of the force would be continued west of the lakes. Senator Casgrain asked if they could be put on trial, he brought east to serve in case of riot.

Sir James: They will be a mobile body.

The bill was given a second reading.

May Abandon U.S. Tour

London.—It is quite possible that the visit of the Prince of Wales to the United States may be abandoned, owing to President Wilson's continued illness, says the Daily Mail. The King has been in communication with the Prince concerning this possibility, and the question will probably be decided soon. If the Prince does not go to the United States, it is understood that he will stay a somewhat longer period in Canada.

British Land Reinforcements

Constantinople.—Two British transports have landed reinforcements on the Turkish Asiatic coast, against the rebels.

Paris.—The supreme council approved the text of a notification to be addressed to the neutral powers, which will be asked to join the League of Nations, setting forth the conditions under which they may adhere to the covenant of the league.

The council also approved the draft note to be sent to Germany demanding the surrender to the allied and associated powers of German ships which were turned over during the war to companies in the Netherlands, and which are at present in German ports. The note declares that the sale of such vessels is contrary to the irregularity. Another draft note to Germany, regarding German representations on the subject of the territory of Memel, on the eastern Baltic frontier of Germany, declares that the allied declines to discuss the destiny of Memel with Germany which renounced its rights over this territory by the treaty of Versailles. The solution of this question, it is stated, concerns only the allied and associated powers.

Beatrice Weller Company

A great artist is born, not made—and with rare good judgment those who have organized the Beatrice Stuart Weller Company, have been able to bring together in this organization three individuals who are all natural artists in their respective lines. Combining instrumental and vocal music with graphic art and strong educational features this company, during the past five seasons, has already won rapidly a place in the top rank of standard lyceum and chautauqua attractions.

Miss Beatrice Stuart Weller

whom Ralph Bingham, the noted lyceum humorist, in his customary delightful style says "Is sure some chalktoonist;" is easily classed as one of the best cartoonists on the platform. Her pleasing personality and happy smile win her audience before she begins to deftly depict phases of human nature as she has seen it in various parts of the world. She accompanies her cartoons with a running fusillade of comment. Miss Weller's landscapes, drawn as an accompaniment to her charming stories, are gems of art and suggest to the connoisseur, rare original talent. In addition to this she gives some of the serious facts about the subject of art, along with her humorous work, so that one feels his time well spent after hearing her.

Miss Charolette Maloney

Violinist, is a charming little lady, from Vermont, who just plays her way into your heart and before you are aware of it she has you fascinated by the sweet strains of her violin. She received her musical education in Boston and New York, and has, for the past three years, charmed people all over America by her mastery of the violin and by her delightful personality.

Mr. W. Leslie Dale

is a baritone of fine temperament. He possesses a voice of rich quality, wide range, and shows splendid native ability, aided by training with exceptional teachers. He loves his art and makes you love it too. Coupled with this delightful feature is a fine dramatic sense which gives added pleasure to his songs.

THEY SAY:

New York Herald

"The Minerva Club held its November meeting at the Waldorf-Astoria. 'Art' was the subject of the evening. Miss Beatrice Weller was the principle speaker and gave us a very instructive 'Chalk-talk' in her own charming and original way."

Washington, Pa., Observer

"Not since the famous cartoonist, Tom in the middle seventies has a Frank Beard, visited Washington with a more interesting and amusing audience been entertained with a chalk-talk than that given by Miss Weller."

An unasked note from the not

Correspondent Red World-Traveler and War My Dear Miss Weller: "Let Peter MacQueen

entertainment you gave us at Hays congratulate you on the fine did line of running comment which you gave us. You have a splentaining but carries a fine moral and is not only humorous and enter-a chalk-talk could be made really well. I certainly never knew that me. I always thought it was a interesting for an old warrior like vicarious fun for grown-ups. You talk for kiddies and a sort of ing philosophy. It's a great cut you have made it an entertain-heard good things of you all art, and I wish I had it. We have this winter. I can surely wish along the way in the Festival work deserve."

Most you all the success that you so well! sincerely, Peter MacQueen.

Milwaukee, Wis.,

"Original and clever, rapid in work and subtle of speech. Miss Weller was a wonder."

Grand Rapids, Mich.

"One of the best of the talent on a fine Chautauqua program."

Battle Creek, Mich.

"Delighted everyone. Her Little Brown Church in the Vale reached the hearts of all."

Cleveland, Ohio, Press

"Miss Beatrice Weller was the last speaker on the morning program (N. E. A. 1908). Her address was 'Motto and Method of Drawing'. It was one of the most interesting talks given, and she received the closest attention from all present."

Port Townsend, Wash., Daily Leader.

The entertainment of the Weller Trio was enthusiastically received by a well-filled house. The program was varied and exceedingly interesting. Miss Weller's lecture was on the little things of life, and she aptly illustrated the events that happen to all. Each new thing brought before the audience by the trio was things of life, and she aptly illustrated the events that happen to hailed with a burst of applause. The initial number of the lecture course was a tremendous success.

Action Against Mennonites

The patience of the Saskatchewan Department of Education in connection with the Mennonite parents who persist in their refusal to send their children to the public schools has become exhausted. This was made plain in order issued to the provincial police to prepare summonses against every parent with children of school age. The Mennonites have made no effort to co-operate with the department.

A Butterfly Farm

Vegetation Consists of Shrubs on Which Caterpillars Live

An unusual "farm" has been started near Maçon, France, by Mr. Andre, a French entomologist. Mr. Andre raises butterflies and silkworms, and so the vegetation of his farm consists of mulberry, oak, ash, cypress, lilac, pine, plum, hawthorn, and other trees and shrubs on which the caterpillars that become butterflies live. In infancy the butterflies are protected by being enclosed in tulle bags which are fastened to the twig or branch on which the young caterpillars are to feed; as the caterpillars get bigger the tulle bags are taken away, and the caterpillars are left free to spin their cocoons, which are collected from the trees and bushes very much like some strange kind of fruit and placed in little wire cages until the perfect butterflies emerge. On this side the work of the butterfly farm is commercial, but no less important is the experimental work of the farm with silkworms, by which means or later the butterfly hopes to provide the world with silkworms that will produce a fine grade of silk in a northern climate.

"Getting Sacked"

From the shores of the Bosphorus sombre, gloomy, menacing for many, comes this addition to our slang dictionary.

One of the sultans of Turkey, always ingenious in matters of this kind, conceived of a new method of disposing of members of his harem of whom he had tired. The former object of his affection was put into a sack and thrown into the Bosphorus, and travellers in Turkey, learning of this novel process, brought back to them to the civilized world the expression "getting the sack."

Sixty Acres Broken In Nine Days

Easy and Rapidly With Which the Prairie of Western Canada Can Be Broken Up

An example of the ease and rapidity with which the virgin prairie of Western Canada can be broken up and made ready for crop is provided by Mr. Howard Blachly, who is farming 480 acres of irrigable land in Southern Alberta, between a Duchess and Patricia.

Mr. Blachly came to Alberta from Idaho some five or six weeks ago, when he inspected the land and purchased it. He returned to Ohio and, after disposing of his property in that state, returned to Alberta. He purchased a Tilton 10-20 h.p. tractor and, with one man to help him, started breaking on September 22. Nine days later Mr. Blachly had plowed 60 acres and had 45 acres of this double-diced and harrowed.

Mr. Blachly is naturally very proud of this performance and states he has never seen land which works in better shape.

Many men get ahead by inducing other men to put their shoulders to the wheel.

Tells how to loosen a sore, tender corn so it lifts out without pain.

Good news spreads rapidly, and druggists here are kept busy dispensing freezone, the ether discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers.

As for any pharmacy for a quarter ounce of freezone, which will cost very little, but is said to be sufficient to rid one's feet of every hard or soft corn or callus.

You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so shrivelled that it lifts out without pain. It is a sticky substance which dries when applied and never inflames or even irritates the adjoining tissue.

This discovery will prevent thousands of deaths annually from lockjaw and infection, heretofore resulting from the suicidal habit of cutting corns.

**Western Farmlands Boom Only Starting**

Americans Coming Into Western Canada Intend to Remain

Farm lands in the good agricultural districts of the West will be much in demand in the next two years, according to Arthur Jackson, Winnipeg, farm land agent, who says that the movement of American farmers to Western Canada has only just begun. That the Americans who are already flocking into the country intend to settle down is evidenced by the fact that they are bringing stock and implements with them.

The reason for the influx of Americans is the boom in Middle West farm lands. Farmers in Iowa and similar states can sell their land now for as high as \$45 an acre, and coming to Canada purchase the best of our western lands for from \$20 to \$35 an acre, depending on location.

So great is Mr. Jackson's faith in the marketable value of farm lands in Western Canada, that he expects to take a trip in about six weeks through North and South Dakota, Minnesota, Iowa, Ohio and Illinois, where he will place large blocks of land on the realty markets. Later he will visit the eastern provinces of Canada for the same purpose.

The British Empire's Total of Fighting Men for the War

Prior to the call to hostilities the United Kingdom had under arms only 73,534 men. During the war nearly seven times that many have been recruited; in all, 497,902—4,006,159 from England, 557,618 from Scotland, 27,924 from Wales and Monmouth, and 134,200 from Ireland. Thus, from a population of 47,000,000, the United Kingdom has raised a total of nearly 6,000,000. The overseas dominions added about twenty-five per cent. more; Canada, 628,964; Australia, 416,809; New Zealand, 220,099; South Africa, 136,070; Newfoundland, 1,922; the smaller colonies, 12,000—in all, 1,425,864. To these India added 1,401,350. Colored troops from other parts of the Empire number 122,837. The British Empire's total of fighting men for the war reached, therefore, no less than 8,654,497. They were distributed as to service as follows: France, 5,399,563; Italy, 145,704; Salonika, 404,207; the Dardanelles, 467,987; Mesopotamia, 889,707; Egypt and Palestine, 112,511. The casualties reported number: in France and Belgium, 2,724,203; in Italy, 69,262; at the Dardanelles, 119,578; in the Balkans, 28,092; in Mesopotamia, 111,549; in Egypt and Palestine, 59,996; in East Africa, 19,572. Worked out in percentages to the total sent overseas, the casualties classify thus: For the United Kingdom, 43 per cent.; Canada, 44.88; Australia, 63.36; New Zealand, 50.70. The United States sent 2,040,000 men to France, and the casualties were 264,998, or 13 per cent.—The Round Table.

Ex-Kaiser's Castles Looted

Values Taken From Berlin By Underground Methods

Thefts from the castles of former Emperor William and the Crown Prince Frederick, not only during the revolution, but during the January and March riots of the Spartacists and Communists, are still engaging the attention of the police. Slowly the authorities have been able to trace some of the valuables that were filched by the sailors who occupied the emperor's palace and that of his son for a time, but an immense amount has been taken from Berlin by underground methods, and may never be recovered. From the palace of William I. there have been stolen squares in bronze and ivory, a bust of Queen Louise, vases, letter containers, silver trays, Japanese silk portraits and curtains, decorative weapons, medallions, watches and mirrors. The Crown Prince's residence suffered similarly. Cigarette cases, of which the Crown Prince had a wonderful collection, are missing, a jewelled collar, writing material, clocks, a watch set with diamonds, and two apples, two automobiles, five hunting guns and a gold revolver.

Best Time to Plow
Never plow ground when it is dry, and never plow ground when it is wet, says Campbell's Scientific Farmer. To plow heavy soil when dry is a positive injury to the soil and a needless waste of power. It is always best to wait until the upper layer is sufficiently moist to turn over easily and crumble readily. Plowing should be done when the soil is in the best condition to respond to the pulverizing effect of the mouldboard.

Education Pays on The Farm!

Statistics show that farmers who have an education make larger incomes than those who have received but little schooling. An education is more necessary now than it was thirty years ago. Farming has changed greatly in this period. Then, farmers cut their grain with a cradle, bound it by hand and threshed it with a flail. They ground their grain between stones and lifted the water out of the well in buckets. They treated their roadside cattle for "halow horn" and "wool in the tail", and planted their grain "in the moon." The horse and the ox were their only means of transportation. The farm houses had no conveniences; houses were lit with candles; the kitchen equipment consisted largely of hard work. Now, the farmers have larger farms, they cut and bind their grain with binders and thresh with engine-driven separators. They frequently plow with tractors and many own automobiles. They select varieties of grain that are known to give larger returns than the ordinary varieties. They treat their seed to control diseases and plant at rates per acre, which experiments have shown to give maximum yields. They select improved types of breeding animals and feed their stock in accordance with knowledge derived from the chemistry of foods. The farm houses have been greatly improved. To keep up with the times and to make the most money from the farm one should know how to farm in accordance with the most improved methods. You can learn these methods at the Olds School of Agriculture. Education pays. You can learn in a few months what it would take years of experience to give you. Talk with any ex-student regarding the value of the course. Classes in Agriculture and Domestic Science commence on October 20th. For particulars write: F. S. GRISDALE, Principal School of Agriculture, Olds, Alberta.

"I Hope Every City and District Will Win My Flag"

When Edward, Prince of Wales—eager, bright eyed, smiling and sincere—arrived in Canada in August, and when he voiced his great admiration of the wonderful achievements of Canadians, on the fields of battle and at home, once again we were thrilled with joyous pride.

He asked concerning Canada's reconstruction programme, and when he was told of the Victory Loan 1919, he graciously consented to the use of his Coat of Arms on a flag, which is to be the prize of honour for districts achieving their quota in the loan.

In dedicating "The Prince's Flag" at Ottawa on Labor Day, His Royal Highness said in part:—

"It is a great joy to me to be associated with the loan, which is the bridge between war and peace, and which is finishing off the job."

"I hope every city and district will win my flag." Striking, and beautiful in design, this flag will not only be a unique memento of Victory Year, but a lasting and outstanding souvenir of the visit of His Royal Highness—a visit which will remain as one of the most memorable events in Canada's history.

The reproduction above shows the design of the flag. The body is white, the edge red; in the upper left hand corner is the Union Jack, and in the lower right hand corner the Prince of Wales' Coat of Arms.

The flag is made in two sizes, 4 feet 6 inches by 9 feet for small cities, towns and villages, and 7 feet by 13 feet 6 inches for cities of over 10,000 population. Canada has been divided into canvassing districts by the Victory Loan Organisations. Each city forms one district. Other districts have been determined according to population.

Each of these canvassing districts has been allotted a certain amount in Victory Bonds to sell. To win the Prince's Flag, therefore, a district has to sell its allotment. That is the one and simple condition.

Anticipating that many districts will buy far beyond their allotment, the organization decided that for each twenty-five per cent. excess of the quota one Prince of Wales' Crest be awarded. Thus the workers in a district doubling its quota will be the proud winners of four small crests for their Honour Flag. These crests will be sewn to the flag. The Prince's Crest—

the three ostrich plumes—is shown at the top of the coat of arms.

To every organization with fifty or more employees, where seventy-five per cent. of the annual payroll in Victory Bonds, a supplementary Prince of Wales Flag in smaller form—48 inches by 34 inches—will be awarded.

The allotment for each district has been carefully considered, and is based on a conservative estimate of the purchasing power of the district.

Your district can sell its allotment and thus win the Prince's Flag, provided each person does his or her share.

You will gladly do your part and encourage your neighbour to do his.

Remember YOUR purchase may be the one that decides whether or not your district is to be the proud possessor of the Prince's Flag.

The Prince's Motto is "I Serve"
Will You also Serve?

Urges Teachers To Hurray

Educator would make High School an Ideal Matrimonial Bureau

OAKLAND, Cal., Oct. 10.—Professor C. E. Hugh of the University of California, speaking at a session of the California Teachers' Association here today, held up the high school as an ideal matrimonial bureau to be sustained for the welfare of the race.

He made a plea for the married teach-

er, saying who knows children better and, therefore, is the better teacher. "If there are teachers in the school who can not get married," he said, "it is time to get new ones."

"The selection of a mate is a long and tedious process," Professor Hugh declared, and it ought to be. The American high school is worth all that it costs, because it brings girls and boys together. It shows them each other at their best and at their worst."

Former Emperor Wilhelm has commissioned a Berlin attorney to institute a suit against the famous actor, Ferdinand Bonn, who portrayed what are known as "Kaiser films," which were barred in Berlin, but permitted to be exhibited elsewhere. Wilhelm charges insult and the misuse of his portrait, and asks the suppression of the films.

A Thank Offering For Safe Return

The Victory Loan Will Give an Opportunity for Many Expressions of Joy

How glad is your heart because your soldier is back home? Truly, it is a gladness difficult to measure.

Would the purchase of a Victory Bond for every cent you could scrape or borrow, measure your heart's happiness?

Victory Loan, 1919, and your soldier's return home have a lot to do with each other. Part of the Loan is to pay the steamship companies for his passage home, and to cover other expenses in connection with demobilization and the end of the fighting.

Mr. E. C. Macdonald has returned to his post in the Bellevue Pharmacy.

Major Johnston Returns

After serving more than three and a half years with the Canadian forces, 14 months of which were spent in France with the 60th Battalion, in the advance positions, Maj. A. C. C. Johnston, M. C., returned to Calgary last week. He joined the 60th Battalion with Lieut. Col. Mason shortly after its authorization, as medical officer, and at the time of the departure of the unit for overseas he had the rank of captain. He did considerable work in connection with the recruiting of the unit. In France Major Johnston did splendid work with the troops in the front lines, and for his gallant conduct under fire was awarded the Military Cross. Since the cessation of hostilities he was engaged in hospital work. His parents Mr. and Mrs. W. H. Johnson, live in High River. He was married in England about three years ago.

Major Johnston resided in Lundbreck several years before enlisting.

Proportional Representation —No. 4

Opponents of the adoption of the Proportional Representation system in connection with parliamentary legislative and municipal elections, to which attention has been devoted in this series of articles, urge:

1. It is too complicated for the voters to understand.

The following was the percentage of spoiled ballots in some elections recently held under the P.R. system: Sligo Municipal election: Votes cast, 2,251; spoiled ballots, 43. Of this latter number, 24 only were attributable to the new system, whilst 19 were declared invalid for other reasons. The percentage of spoiled papers due to the P.R. system was, therefore, just over 1 per cent.

Edinburgh election: Votes cast, 124,107; invalid from all causes, 2,750. The method of counting the votes is too elaborate and the process takes too long.

The following comments from places where P.R. has been tried may be taken as indicative of feeling of the question:

(a) Glasgow: The returning officer in one day counted no fewer than 124,000 votes, spread over seven electoral divisions of the city.

(b) Calgary: It took 2½ times as long to count ballots as under the old system.

(c) Kalamazoo: It took 6½ hours to count 4,461 ballots.

(d) Of the election in Sligo, "The Champion" of that city says: "The system has justified its adoption. We saw it work; we saw its simplicity. We saw its unerring honesty to the voter all through. . . . It is as easy as the old way, it is a big improvement, and it is absolutely fair."

It is very plain, very simple. However, even if two or three days were consumed in counting the ballots, there are still over 36 days left in the year for the Government to function, and the new Parliament, Legislature or Council never takes office immediately. If P.R. secures more representative government, would not the time be well spent?

Again, is the ordinary voter concerned with the actual work of counting the ballots? Is not this done by appointed expert officials now? Could not the P.R. method be carried on by such officials also, and possibly by even more expert men than are now selected as returning officers?

3. It divides the electorate into groups and fosters group feeling.

Is not group feeling more apt to be inflamed by lack of adequate representation? In cities where the ward system prevails, this same group or sectional feeling is cultivated, whereas under P.R. the ward system can be done away with while at the same time making adequate provision that minorities can secure their proportionate representation in the Council.

4. P.R., by giving complete repre-

sentation to the people, will weaken government and make it unstable.

This criticism is not borne out by experience where P.R. has been tried. The strength and stability of a democratic executive depend upon two factors—its personnel and its ability to interpret the will of the people. P.R. tends to strengthen the personnel. M. Georges Lorand, the well-known Belgian M.P., states that under P.R. not only were all parties represented in Parliament, but they were represented by their ablest men and leaders, whilst under the former majority system prominent men passed half their lives outside the House. Parliamentary life has consequently gained in authority. "Perhaps the principal benefit of P.R.," he adds, "has been that political life, which has been intensified everywhere, has also been purified, the weapons employed being generally more courteous and more dignified."

Further, a democratic government will be stable if it interprets the will of the people correctly, and P.R., by making our public bodies completely representative of the people, places in the hands of governments a more effective instrument for ascertaining what that will is. This explains why P.R. has rendered government in Belgium stable.

There are many other objections advanced against Proportional Representation, but these are the chief ones, and certainly they do not hold against the manifest fairness of the P.R. method to all people in the election of their representatives.

As pointed out in the first of these articles, the principle of Proportional Representation has now been endorsed in Canada by the National Liberal Convention, the Great War Veterans' Association, the Canadian Council of Agriculture, the Labor party, Social Service Councils, and numerous other reform organizations. It was endorsed by the recent Industrial Conference at Ottawa, and the Government has announced its intention of having an exhaustive inquiry made with a view to its adoption.

People everywhere should, therefore, embrace every opportunity that presents itself to study the question and become as fully informed as possible in regard to it, as it is practically a certainty that it will be adopted in Canada in the not distant future. It is to encourage such closer study that this series of articles has been written.

Worms, however generated, are found in the most inaccessible places, where they set up disturbances detrimental to the health of the child. There can be no comfort for the little one until the harmful intruders have been expelled. No better preparation for the purpose can be had than Miller's Worm Powders. They will immediately destroy the worms and correct the conditions that were favorable to their existence.

Wool Brings Satisfactory Price

W. J. Stark, secretary of the Alberta Provincial Sheep Breeders' Association, received a check for \$65,765.20, being a remittance from the Canadian Co-operative Wool Growers Ltd., of Toronto, on account of the wool shipped them for sale by the local association, and which was contributed by 324 sheep owners in northern Alberta and six from British Columbia. The wool has not all been sold as yet, and this remittance is on the basis of 8c below the market price on each grade. While the balance of the wool is sold the contributors will be sent the amounts necessary to balance their accounts. The wool which has been sold has brought a very satisfactory price; some of the fine medium combing has been sold at 68½ cents per lb., the fine medium clothing brought 65 cents.

Had a Very Bad Attack

Bowel Complaint

IT WAS CURED BY

DR. FOWLER'S

EXTRACT OF WILD STRAWBERRY

Any one suffering from bowel complaints such as diarrhoea, dysentery, colic, cramps and pains in the stomach, summer complaint, etc., will find that Dr. Fowler's Extract of Wild Strawberry will give quick relief and more permanent relief than any other remedy on the market today.

This old tried and proven medicine has been on the market for over 74 years. You don't experiment when you buy it. Surely the test of time proves this.

Mrs. Daniel Hartwick, Mountain Grove, Ont., writes: "I used Dr. Fowler's Extract of Wild Strawberry and have found that it is a good remedy. When my little girl was 2½ years old she had a very bad attack of bowel complaint. Nothing prescribed by the doctor seemed to do her any good. She got worse, and we thought we would lose her. I got a bottle of Dr. Fowler's, and she soon found relief. Everyone who has children should not put it without it in their home."

Price 35 cents a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Missed a Mixup

An amusing incident in which the chauffeurs of M. Clemenceau and M. Millerand, the Governor-General of Alsace-Lorraine, played the principal parts, occurred recently in Paris. The chauffeurs were driving their distinguished employers through one of the main thoroughfares of Paris the other day, when in some way they nearly collided. Both drivers were convinced the other was to blame, and with much gesticulation began to abuse each other volubly. An unpleasant scene was developing when the chauffeurs recognized that the men they were driving were saluting each other from the carriage windows with every mark of amity and profound respect. The drivers' quarrel terminated abruptly, and with a superb air of dignified indifference they continued their journey.

Canadian Lumber

In Britain

Prejudice Against Frame Houses, Is Giving Way in Old Land

London.—Pressure in favor of wood houses in Britain has become so great that it is unlikely any local objections will have any weight against the intention of the ministry to legislate to avoid existing restrictions. A number of municipalities in Scotland have already taken steps to repeal restricting regulations. It is probable Scotland may lead Britain in wood construction.

It is understood Canadian parties are interested, and an estimate of the plans has been submitted to the ministry of health housing committee, stating that the buildings proposed by the ministry's architects would be as discreet to Canadian industry, being ugly in appearance, inconvenient in design and will generally defeat popularity.

The raising of restrictions, however, will give Canadian house building a vast market if they co-operate. They propose supplying Britain and Europe with materials for mill-cut houses. Complete enquiries as to Canadian houses have been received from France, Belgium, and Mediterranean countries, even as far east as the Palestine. The Montreal Star understands that one European order for 20,000 mill-cut houses has already been booked. Enquiries show that prospective orders in the near future will be well up to \$100,000.

British Salvaging Ships

Occasionally Divers and Surface Helpers Bring Up a German Submarine

The British are energetically at work undoing to a certain extent the work of the U-boat. Already it is reported that ships to the value of \$250,000,000 have been raised by the Admiralty's salvage department. In the case of colliers and some other vessels, the cargoes also are regained. Of course, costs of salvaging are heavy, but the profits are sufficient to warrant the effort.

No unusual methods are employed by the salvaging departments. Steamers with the most modern pumps and powerful lifting lighters are used now as heretofore. Until new methods are evolved there will be many ships in deep water which will stay there, but the majority of the sinkings were in comparatively shallow water. It even has been said that the Lusitania might be raised or, at least, the hull in her cargo recovered. In this connection it is interesting to note that \$9,500,000 worth of bullion recently was taken from the wreck of the Lusitania.

Occasionally the divers and their surface helpers bring up a German submarine, and perhaps a number of secrets of those craft have been revealed to the Admiralty. While the submarine fleet was being reduced after the armistice, it is well known that the Germans had removed many devices which were peculiar and valuable accessories to these craft.

Bela Kun to Face Trial

For Incitement to Murder, Robbery and Forgery

Bela Kun and his associates are to be prosecuted for incitement to murder, robbery and forgery.

This man's name would be Adolf Cohen, in English. Kun was unheard of in Hungarian politics until last year. He is 37 years old and married. Before the war he was secretary of the local workmen's union, in Lagyvarac, near Arad. He was arrested for stealing the union funds, 30,000 kronen, and prosecuted. On his promise to pay back the money in instalments he was released. When the war started he was mobilized with the rest of the Hungarians. He either deserted or was taken prisoner by the Russians, for about one year ago he was in Petrograd acclaimed as one of the brightest pupils of Lenin. Supplied by funds from the Bolshevik treasury, he returned to Hungary and organized a reign of terror, organized the radical mob, and entered the field against the Czechs, Poles and Rumanians.

Excavations in Greece, Italy and Egypt have shown that Baltic amber was famous hundreds of years before the Christian era. Herodotus wrote of it, and beads, which the ancient Lithuanians must have bartered, were discovered in the Grecian ruins of Mikenal, dating back to 1500 B.C.

You may have noticed that the man who can turn his hand to anything seldom has the price of a wooden overcoat, when he turns up his toes.

Experience is a good teacher, but some men are conceited enough to think that they can give experience a few pointers.

HOW TO "BE FIT" AT SIXTY

BY DR. LEO HERBERT SMITH

As our boys "came marching home," they brought a certain red-blooded doctrine, and showed us the glory of a perfect body. They will show us how to "keep fit" even if we have passed middle life and are beyond the athletic stage. For the tired business man, the man who feels the daily grind and the nightly fatigue, has meager appetite, headaches, nerves unstrung, is gloomy, ending in a soggy brain, try the right way. Get out of bed, open the window, breathe deeply, exercise the army "setting-up" exercise or use dumb bells, until in a warm glow.

Before breakfast take hot water, and occasionally castor oil or a pleasant laxative made up of May-apple, aloin, jalap, and sold by all druggists as Dr. Pierce's Pleasant Pellets.

As Prof. Strauss says, "The excretion of uric acid we are able to effect by existing diuretics, six or eight glasses per day, hot water before meals, and obtain Anurie Tablets, double strength, for 60 cts., at the nearest drug store and take them three times a day. If you want a trial package send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y." "Anurie" (anti-uric-acid) is the recent discovery of Dr. Pierce and is much more potent than lithia, for it will dissolve uric acid as hot tea dissolves sugar.

Natural Salt Beds in Alberta

Provincial Government Developing Immense Deposits Near Fort McMurray

Drilling for salt at Fort McMurray, Alberta, has just been commenced, according to an official of the Department of Mines. An outfit, with seven men, has just been sent in by the provincial government. The deposit underlies the town of Fort McMurray, so is feasible from the transportation standpoint.

According to previous investigations, there is a bed 180 feet deep, lying 480 feet under the surface. Professor Allan, of Alberta, was sent in by the provincial government a couple of months ago, and he reported very favorably.

It is not decided whether the government will mine salt, supposing everything is as expected, or whether it will turn the work over to a company.

THE COW PUNCHER

— BY —
ROBERT J. C. STEAD

Copyrighted, Canada, 1918, By The Museum Book Co., Ltd., Toronto. Printed By Special Arrangement.

(Continued.)

At last he found it, but it read like this:

"Fire this morning gutted the Great West Clothing Store with a loss of \$8,000, of which \$4,000 was covered by insurance in the Occidental. Frank Beecher, proprietor of the store, was overcome by smoke, and is in the city hospital."

"Smoke was first seen issuing from the back of the store by Fred Grant, a delivery man for the Imperial Laundry, who turned in an alarm at 10:08. Owing to the fire team colliding with a dray owned by Sheppard & Co., some minutes of delay occurred. During this period the building, which was of frame, turned upside down. It was almost completely destroyed, although some of the stock may be salvageable."

Beecher rushed into the back room for certain papers, where he was found by Firemen. He was in a comatose condition. He is recovering, and is already planning to rebuild."

"I guess you won't need me any more," he said. "I'm sorry I made a mess of that fire story."

There was a kind twinkle in the chief's eye as he answered, "Nonsense. Of course we need you. You have merely made the mistake everyone else makes in supposing you could write for a newspaper without training. We will give you the training — and pay you while you learn. The only man we can't use is the man who won't learn. Now let me give you a few pointers, and the editor got up from his desk and held the paper with the fire story before him. "In the first place, don't start a story with the 'at', at least not more than once or twice a week. In the second place, get the meat into the first paragraph. Seventy-five per cent. of the readers never go further than the first paragraph; give them the raw facts there; if they want the trimmings they will go down for them. That is where a magazine story is exactly opposite to a newspaper story; a newspaper story shows its hand in the first paragraph, a magazine story in the last."

"Then, get the facts. Nobody cares whether the fire bell rang or not, but they do care about the man who was suffocated; who he was, what he was doing there, what became of him. Revel in names. Get the names of everybody, and get them right. The closest thing to a lie in the town will be a paper if it has his name in it. Every story, no matter how short, is good for a number of names. In your copy as you turned it in — the editor picked it up from his desk; he had evidently saved it for such an occasion as this — the only man you had was that of the clothing store. It had one of the other boys get to work on the telephone, and you see he got the name of the proprietor; of the in-

insurance company, with the amount of the insurance; of the man who turned in the alarm; of the owner of the dray, and of the fire engine, and of the firemen who carried Beecher to safety. Every one of these people, with their families, their cousins, and their aunts, become especially interested in the story the moment their names are introduced. "Next, remember that it is not the business of a reporter to pass editorial comment. It may have been too bad that the fire engine was delayed, but that is a matter for the editor to decide. The business of the reporter is to find out why it was delayed, and state the facts, without regrets or opinions. You must learn to hold the mirror up to nature without making faces in it. You know what I mean — keep your own reflection out of the picture. If you think the incident calls for a word of opinion by the paper, write an editorial and submit it to me. But remember that the editorial and news columns of a paper should be as distinct as the two sides of a fence."

"Thank you very much," said Dave slowly, when he was plain the editor had finished. "I think I begin to see. But there's one thing I don't understand. Why did you not mention the origin of the fire?"

A flicker of amusement — or was it confession? — ran across the chief's face as he answered. "I'm sorry we don't know what started it," he said. "Beecher is one of our best advertisers. To say the origin of the fire is unknown always leaves a smudge of suspicion. It is like the almost impossible shrug of an aborigine. The mention of a woman's name, you can't get away from it. And it is the advertiser who keeps the paper alive. I know it's not idealism, but idealism doesn't pay wages and paper bills, and as long as readers demand papers for their families, we must print what they will have to take second place to the advertiser."

"Then all reports are to be colored to suit the advertiser?" demanded Dave.

"No. Where a principle is involved — and we have principles, even in these degenerate days — we stand by the principle, even if we lose the patronage. Our notions of what is fair for the public good have cost us a lot of money at times. You see, the exploiter is always ready to pay his price, which is more than can be said of the public. But the real principle is involved, we try to be friendly to our friends."

"With these fresh viewpoints on his profession Dave entered upon his work the following day chastened but determined. Almost immediately he found the need of acquaintanceships. The isolation of his boyhood had bred in him qualities of aloofness which had now to be overcome. He was not naturally a good "mixer"; he preferred his own company, but his own company would not bring him much news. So he set about deliberately to cultivate acquaintance with the members of the police force and the fire brigade, and the clerks in the hotels. And he had in his character a quality of sincerity which gave him almost instant admission into their friendships. He had not suspected the charm of his own personality, and his discovery, feeding upon his new-born enthusiasm for his friendships, still further enriched the charm."

As his acquaintance with the work of the police force increased Dave found his attitude toward moral principles in need of frequent readjustment. By no means a Puritan, he had, nevertheless, two or three qualities which so far had saved him from any very serious misstep. He practised absolute honesty in all his relationships. His father, drunken although he was in his later years, had never quite lost his sense of commercial uprightness, and Dave had inherited the quality in full degree. And Reenie Hardy had come into his life just when he needed a girl like Reenie Hardy to come into his life. If anything, almost might go on so long as its effects were confined to the voluntary participants. Underneath the shad of good behavior was a world, known to the police and the newspaper men and a few others, which refused to accept standard conventions and life according to its own impulse. And this world included so-called best citizens, of both sexes. And they were good citizens. It seemed the community had two natures; a sort of Dr. Jekyll and Mr.

HOW THIS NERVOUS WOMAN GOT WELL

Told by Herself. Her Sincerity Should Convince Others.

Christopher, Ill. — "For four years I suffered from irregularities, weakness, nervousness, and was in a real down condition. Two of our best doctors failed to do me any good. I heard so much about what Lydia E. Pinkham's Vegetable Compound had done for them, I tried it and was cured. I am no longer nervous and irregular, and in excellent health. I believe the Compound will cure any female trouble." — Mrs. Alice Hixler, Christopher, Ill.

Nervousness is often a symptom of weakness or some functional derangement, which may be overcome by this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound. Thousands of women have found by experience.

Hyde on a community basis. Splendid qualities: large heartedness, generosity, were mingled with streaked through it degrees of selfishness and lust running down into positive crime. And the wonder was not what the papers printed, but what they left untold. And he was glad he had met Reenie Hardy. She was an anchor on his soul. — Edith Duncan.

One morning, as he sat with Carson of The Times at the reporters' table in the police court, listening absently to the clerk calling a list of names, his companion, with a grin, intimated that there was something beneath the surface. "Pure fiction," he whispered, as the list was completed. "It would do you good to know who they are. Shining lights, everyone of them. And when they are lit up they can't be kept under a bushel. The police just had to do something. They won't be here — not one of them. Their lawyer will plead guilty, and pay the fines, and every one will be sorry — they were caught. Even his sister on the bench isn't twice as happy. It was by good luck he wasn't with the bunch himself."

It turned out as Carson predicted. One of the leading lawyers of the city addressed the court, expressing the regret of his clients that the behavior had necessitated interference by the police. He was full of suave assurances that no disrespect of the law, nor annoyance to any member of the community was intended, and he pleaded feelingly for as great leniency as the court might consider consistent with the offence. The minimum fine was imposed, and the lawyer withdrew, bearing with him the double happiness of having earned a

good fee and having saved a number of his personal friends from a public exposure which would have been, at best, embarrassing. As the lawyer passed the reporters' table Dave felt something pressed into his hand, and heard the whispered words, "Split it."

In his hand was a ten dollar bill. "What's the idea?" said Dave to Carson, when the session was over. "The idea is that I get five," said Carson, "and both of us, forget it. Cheap skate, he might have made it twenty. Of course, the names were bogus, but they couldn't risk mention, even with that precaution. Easy picking, isn't it?"

"It doesn't look quite right," Dave faltered. "I'm here to get the news."

"Oh, can that. You know we don't publish all the news. Why, man, we'd wreck society, or the ship of state, or whatever it is we are all doing on, if we did that. We'd have every lawyer in this burg busy in a week, and they're making too much money already. What the world doesn't know the world doesn't grieve over. And the good of it is, everybody thinks he's getting it over somebody else, and while it's busy thinking that somebody else is putting it over him. So they're about even in the finish. Besides, if you talk about principle, doesn't the Bible say to do unto others as you would that they should do unto you? How would you feel in their position?"

Canadian Grown Seeds

In Many Cases Are Superior to the Imported Varieties

Since 1914, important, almost countless developments have taken place in roots. Previous to the war, Canada imported 95 per cent. of her seed, but war conditions emphasized the fact that she should depend on her own resources. At the present moment Canadian-grown seeds compare most favorably and in many cases are superior to the imported varieties.

Mangel seed in British Columbia has exceeded a ton an acre. Carrot seed in the same province is not only extremely heavy, but is of A1 quality. It has been found that Nova Scotia is essentially a turnip growing home. The result of what were originally only experiments has proved conclusively that Canada will not only be able to supply her own needs, but will be able to export in large quantities. With this end in view, the experimental stations in both Eastern Canada and British Columbia are being utilized for the purpose of providing seed growing concerns with stock seed, in other words the guaranteed pure and first quality article.

Chinese Department Store

Complete Equipment by Selling Most Accommodations

The American traveler in China may nowadays be reminded of home by the new Chinese department store, but there is one thing about the department store in China that serves as a special reminder of other days and ways in America, to the American of an older generation. Modelled on the American department store, and dealing in many familiar commodities from the United States, the emporium in Hong Kong or Shanghai still employs the cash boy, for the highest cost of cash boys in China still leave their employment cheaper than the installation and maintenance of the overhead carrier. Otherwise the Chinese department store out-modern western modernity, for it completes the utility of its equipment by selling hotel accommodations. — Christian Science Monitor.

Heligoland Resuming

Correspondent Reports State of General Satisfaction Among Islanders

The islanders, forced to migrate to the mainland during the war, have come back to Heligoland, and the smallest Nation in the world, as the Heligolanders like to call themselves, is hoping that by another season the island will again be a popular summer resort. The thought that most disturbs them is the possibility that the demolition of the fortifications by the Germans has rendered the island so vulnerable to attack that they will be obliged to arrive for that purpose may work some injury to the natural beauty of Heligoland. A correspondent who went there to have a last look at the German engineering which will soon be demolished, reports a state of general satisfaction among the islanders, and finds that Prussianism seems to have left no impress on the civil population. The feeling is everywhere that the future looks full of promise, and that the past is well got rid of.

"FIDDLE-FIT"

Keep Liver and Bowels Clean and Active with "Cascarets"

Sick headache, biliousness, coated tongue, sour stomach, always trace this to torpid liver; delayed fermenting food in the bowels. Poisonous matter clogged in the intestines, instead of being cast out of the system, is reabsorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food, and four days, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will have you feeling clear, rosy and as fit as a fiddle by morning. They work while you sleep.

Town Planning

Meeting Will Be Held Under the Auspices of the Commission of Conservation

Ottawa. — The Canadian News Office has received the preliminary program of the meeting of the American City Planning Institute of America, which will be held under the auspices of the Commission of Conservation of Canada on October 17 and 18. Addresses of welcome will be delivered by the Hon. N. W. Rowell, president of the Privy Council, and Harold Fisher, mayor of Ottawa. Reports will be submitted and discussions take place on the following subjects: Fundamentals of city planning; street widths, zoning-nomenclature; details to be carried out by special zoning ordinances or in connection with housing, health, fire protection regulations; economic design of utilities in streets; lot subdivision.

A highly important address will be delivered by Brig.-Gen. C. H. Mitchell, dean of the School of Practical Science, Toronto University, on the second day, the subject being "Reconstruction and Town Planning."

The session will wind up with addresses by two town planning experts, namely, Thomas Adams, chairman of the Canadian Town Planning Institute, on Practical Housing, and by Norman Cawthra, chairman of the Ottawa branch of the Canadian Town Planning Institute, who will speak on the planning of Ottawa.
